CALL FOR PAPERS

Black is everything, everywhere, and encompasses all. Our goal is to showcase the fluidity and abstractness of “environmental justice.” This can include, but is not limited to: political oppression in Black communities, environmental racism and natural resource inequality, food apartheid, inequitable law enforcement, special topics in diasporic relationships, Black music and resistance, philosophy, Black arts and poetry, and whatever else may interest you! We are thrilled to have your submissions and cannot wait to see you in the Spring!
